Consumers demand cosmetics and toiletries that enhance their appearance and personal sense of well-being that are also safe to use. Producers, meanwhile, are keen to maintain their reputation for safe, effective and innovative cosmetic products that meet the requirements of ever-demanding consumers.

At the same time, cosmetics and detergents are subject to an international legislative and regulatory environment that affects every part of the manufacturing and supply chain. This is a major challenge for companies operating internationally, who have to balance differing legal requirements while maintaining the integrity of their supply and service.

A global role for India's manufacturing capabilities

For manufacturers in India, the globalised cosmetics & detergents industries offer huge opportunities. It is a highly desirable location for international companies looking to outsource their production, or invest in their own facilities. India's booming economy is also fuelling rapid growth in domestic demand for cosmetics and homecare products.

The Cosmetics & Detergents Manufacturing Congress (CDMC) is India's first exhibition dedicated to the technology, processes and practices involved in delivering cosmetic & detergents products from the formulator's bench to the final consumer. As an exhibitor, you have a unique opportunity to present your technology and services to a national and international audience looking for new ways to manufacture cosmetics & detergents safely and cost-effectively in India.

CDMC recognises the importance of keeping up to date with all aspects and developments relating to making cosmetics & detergents – providing crucial insights into this demanding and complex process for the many different types of people responsible for taking products from bench to consumer.

Attendee Profile

- Owners of small brands
- International cosmetics and toiletries brands looking to outsource production or invest in their own facilities in India
- Process development chemists
- Process engineers and managers
- Quality assurance managers
- Testing laboratory managers
- Legal compliance managers
- Marketing executives
- Product managers
- Business development managers
- General management
- Consultants

Exhibitor Profile

- Processing
- Packaging
- Labelling
- Contract manufacture
- Laboratory and testing equipment
- Regulatory environment
- Market research
- Creative services
- Consultant drop-in centre

The world's cosmetics and detergents. Made in India.

Meet the Challenge

Seminars that address making cosmetics from start-up enterprises to small / medium companies to large-scale production. Topics cover: Exporting; Legal Compliance (domestic and international); Testing for Safety, Flammability, Compliance, etc; Contract Manufacture; Contract Formulation; Product Stability; Formulation without a Laboratory.

Technology Focus

Seminars that tackle key issues in the manufacturing process, hygiene, microbiology, filling, source of containers, packaging, labelling and supplying cosmetics and toiletries.

Legislative Update

Leading authorities provide an update on the latest developments in legislation, regulations and compliance.

Market Trends

Consumer attitudes, perceptions and preferences shaping markets. Crucial insights for marketing and business development.

Applied Technologies

Technical papers presented by suppliers featuring developments in making cosmetics and toiletries.

From Bench to Consumer

CDMC is designed to complement its sister event, Homecare & Personal Care Ingredients (HPCI), which deals with all aspects of creating and formulating cosmetics and homecare products. Attending both events, which take place at the same venue a week apart, will give you detailed information and insights into the whole process for taking products from creative research and development to the consumer. For more information about HPCI, please visit www.hpci-congress.com.

An international perspective

CDMC and Hpci are organised by Step Exhibitions and Verlag fuer chemische Industrie – a UK and German based venture with vast experience in the personal care and homecare markets. Accordingly, CDMC is supported by SOFW and Personal Care magazines with circulations around the World that will bring CDMC to the attention of an international audience. This combination will give CDMC a truly global reach.
